

AMAZON UK MECHATRONICS MAINTENANCE APPRENTICE PROGRAM

Our apprenticeships

Learn As You Earn – Life changing careers with Amazon Apprenticeships

A qualification and a career at the same time? That's a bit like having your cake and eating it, right? But it really doesn't have to be one or the other. Learning and earning within an apprenticeship means you get both – a qualification and a career.

Amazon offers a range of opportunities to suit candidates with different backgrounds, qualifications and career aspirations. That is why we believe it is the perfect place to learn new skills.

Our European Operations Teams are crucial in ensuring that we continue to deliver and innovate for customers. We have big plans and want to continue to develop and retain the best talent.

Amazon apprenticeship schemes are aimed at people who have a passion for learning and want to start a career now – or possibly retrain in a new direction.

To be successful you will need to be committed to your own development and be prepared to make the most of the opportunities, hands on experience and qualifications given to you.

After graduating with us, you'll be qualified to apply for a permanent role within our team. Roles are available throughout the UK, please check our website www.amazon.jobs/apprentices to find a vacancy near you.

Mechatronics maintenance apprenticeship

Amazon is the perfect place to start your career in mechatronics maintenance. As one of the world's largest retail companies, we have an unrivalled range of equipment, technologies and facilities, so there are a huge variety of projects you can work on during the program.

You will build your skills over a **48-month** period - starting in September - that will include:

- Classroom based training hosted offsite,
- Amazon's on-the-job training program, delivered by our specialist teams,
- Mentoring from our RME engineers.

Year 1 is full time residential (classroom training) at one of our provider's facilities. As a result, you may be required to travel to the accommodation on a Sunday and to work away from home until Friday each week during term time (costs will be supported by Amazon) this is combined with short periods working at one of our Fulfilment Centres. This will give you a thorough and detailed insight into the work of the RME team as well as the basic skills necessary before working on our equipment.

Subsequent years will be made of day or block release training at a specialist college - to study for an HNC in Electronic & Electrical Engineering - and on-the-job training in a Fulfilment Centre amongst our team of technicians and engineers.

Basic Qualifications

- For the apprenticeship program we prioritize applicants eligible to government funding for their apprenticeship and for this you need to:
 - Have lived in the UK or in the European Economic Area (EEA) for the last 3 years
 - Be a resident of the UK for the entire duration of the program (48 months)
 - Not be registered to study on a UK government funded course ending August 2020 or later
- You will be 17 years and 6 months old or older before the contract's start date (September 2020)
- You have 5 GCSEs at Grade C/4 or above (or equivalent), including Maths, English and a science/technology subject
