Caludon Castle School Careers Bulletin

Monday 3 June 2024

If you have any questions about any of the information in this bulletin, please contact me by email.

Careers advisor

Carole Foster, our Careers Advisor, is currently making appointments to see Y10 and Y11. She is also happy to see students from Y9 to Y13 who are in need of advice.

Let your year leader or Ms Hutchinson know if you want to see her. Post-16 students can email the pastoral office directly to ask for an appointment if they wish.

Apprenticeship at HSBC

HSBC have a new apprenticeship programme live which may be suitable for you.

Details below:

- The apprenticeship is within the HSBC Commercial Banking team. The role is Financial Support Manager Apprentice.
- It's an 18-month apprenticeship programme.
- Candidates will be given the skills and knowledge to successfully provide an excellent telephony service to our customers.
- We will provide successful candidates with support and development to work towards a Senior Financial Services Level 3 apprenticeship qualification, applying learning into practice through a blended learning experience.
- This is an exciting, full-time, hybrid role based at 1 Centenary Square, Birmingham, B1 1HQ, starting in the business in September 2024.
- Candidates will be guaranteed a permanent job with us on successful completion of the programme.
- Applications are now open. You are encouraged to apply as early as possible to avoid disappointment.

Apply via: UK Apprenticeships | HSBC Holdings plc

Apply now for an entry-level role with HSBC in Birmingham

Do you have passion and drive to deliver exceptional customer service? If so, we have an exciting opportunity for you.

Join us on a hybrid, permanent, entry level opportunity based in central Birmingham. You'll join HSBC on an 18-month Senior Financial Services Level 3 Apprenticeship Programme, where you'll gain an understanding of the financial sector whilst working directly with our customers within a telephony role.

We're looking for people who are resilient and have a high level of empathy. Customer service experience is desirable, but not essential.

You'll receive a competitive salary and benefits package, as well as support and encouragement to develop and progress your career.

You will need:

- 5 GCSEs, including English and Mathematics at Grade 4/C or above (or equivalent)
- A minimum of 2 A Levels at Grade C or above (or equivalent)

Apply now:
Via the QR code below and/or via hsbc.com/careers > Student Opportunities > UK Apprenticeships

Get in touch: apprenticeship.team@hsbc.com

Applicants are encouraged to apply as early as possible to avoid disappointment.

Deadline: early application is advised as adverts will close once the recruitment target is reached

I hope this is of interest!

Success at School: Working in Health and Safety

The great thing about jobs in **Health and Safety** is that they could offer you a pathway into virtually any industry – from TV and film to fashion and even the performing arts. Today, we explore the wide variety roles of roles in this area plus the different routes into the industry.

What roles are available?

Health and safety coordinators: working to reduce accidents, injury and health problems in the workplace.

Quality, Health, Safety & Environment (QHSE) professionals: this role also covers the quality customers expect and environmental regulations organisations have to follow.

Building safety regulatory lead: this job comes with a lot of responsibility, making sure your organisation sticks to the law when it comes to building safety regulations.

Fire safety professionals: you make sure organisations minimise the risk of fire and have a plan to deal with fires if they occur.

What skills do I need?

- **Communication:** You'll be able to communicate important safety information to colleagues and clients – people's lives could depend on it.

- **Problem solving:** As well as identifying health and safety challenges in the workplace, you'll be able to recommend solutions colleagues can put into action.

- **Project management:** You may be tasked with designing a safer workplace, so you'll need to be able to see a project through from start to finish.

What subjects could I take?

You can pursue a career in Health and Safety no matter what academic route you go down – but here are some ideas about how your school/college subjects can help you develop the skills and understanding needed to succeed in this career path.

Business studies

Understanding how businesses work will help you foresee the kinds of health and safety challenges you may be faced with – as well as the businesses goals your clients are focused on.

Physical education

Studying PE will help you build an understanding of the body's capabilities, limitations and how it is affected by physical strain – essential knowledge for any Health and Safety professional.

Psychology

A priority for many within the Health and Safety industry is convincing employers and employees to adapt their behaviour. Understanding what makes people tick will help with this task.

A whole range of school subjects can equip you for a Health and Safety career. Maths, for example, can provide you with those all-important problem-solving skills, while Design and Technology could help you come up with healthy workplace adaptations and practices.

Uni or Apprenticeship?

University:

Industry body **NEBOSH** offers a level 6 National diploma for Occupational Health and Safety Management Professionals (equivalent to a Bachelor's degree), covering occupational health and safety. NEBOSH offers two types of Master's degrees, jointly with the University of Hull, for those who already have a diploma. There is a range of MSc qualifications to choose from, or alternatively, you could do the more research-based MRes degree.

Apprenticeship

With a level 3 health and safety apprenticeship, you could complete qualifications such as the NEBOSH national general certificate as part of your programme. Check out NEBOSH's interview with Faye, who did just this with Caerphilly Country Borough Council in Wales. Faye took two weeks out to complete her certificate – qualifying aged just 19 and extending her apprenticeship by 12 months.

Top Tip

If you're interested in a career in Health and Safety, consider completing the **NEBOSH** National General Certificate in Occupational Health and Safety. It is a great stepping stone to further qualifications and is recognised internationally!

Other things to consider…

Health and Safety offers you a way into a whole host of other areas of work – for example, you could work at a music venue, on a film or TV set or in the fashion industry. If you work for a consultancy, your role could be varied – giving you the chance to visit a different kind of workplace each week! Check out the full **Health and Safety Career Zone** on our website for more details.
